

Edge™ 28B

Walk-Behind Sweeper

Quietly Handles Hard and Soft Surfaces Alike

The Kent Edge™ 28B is out to change how you think about sweepers. It may just be the quietest, most versatile and most productive walk-behind sweeper you can buy.

Thanks to a specially engineered broom, the Edge 28B transitions effortlessly from hard to soft surfaces, without hesitation or adjustments. This not only saves time, but also the need to invest in separate machines. The Edge's side broom makes quick work along the base of walls, crossing yet another task off the list, and saving additional time. In fact, the Edge 28B sweeper is 2.5 times more productive than a vacuum of the same size.* And, with running noise levels barely reaching 59 dB A, the Edge 28B allows your crews to remain productive even in occupied facilities.

Like all Kent products, the Edge 28B is easy to operate and easy to maintain. It comes equipped with a long lasting, no fuss gel battery, onboard battery charger, a durable polyester filter and tools free broom removal. The Edge 28B is so easy to operate that training is a non-issue. So simple, so productive – so typical of Kent.
