

# Klenzor®

## Self Contained Carpet Extractors

The Kent Klenzor® self contained portable extractors are available in either 16 or 18 inch cleaning paths. The unique aerodynamically designed vacuum shoe leaves carpets dryer so foot traffic can get back on the floor sooner. Laminar flow technology provides constant acceleration throughout the vacuum shoe reducing turbulence and increasing water pick up so carpets are left cleaner and dryer.

Both Klenzor® models utilize single deflector spray jet technology. A single spray jet ensures even water and chemical coverage across the cleaning path. This eliminates the potential problem of uneven cleaning and streaks.

The Klenzor® 18MPH (Multi-Position Handle) features dual method cleaning with one machine. The adjustable handle can be positioned in the traditional or edge extraction mode for detailed extraction in small areas. The multi-position handle can also be flipped over to the front of the machine to convert the Klenzor® into a walk-behind extractor for extracting hallways and large expanses of carpet.

### The Klenzor® 16 & 18MPH models are perfect for...

- Offices
- Schools
- Government Facilities
- Healthcare Facilities
- Retail and Malls
- Restaurants

**KENT**  
Simple. Clean.
