

Rainmaker® H and C

Portable Extractors

The Rainmaker® is a 100 psi portable extractor. The Rainmaker H is a hot water model for deep restoration jobs and the Rainmaker C is a non-heat model. With a 14 gallon solution tank, the Rainmaker is large enough to get the job done, but compact for ease of maneuvering and transporting.

The Rainmaker H features instant heat to 212° F at the wand tip. In addition, the heater has only a 10° F variable so the water stays hot. An independent circuit locator identifies when the machine is plugged into separate circuits to prevent blown circuits. The high temperature water, combined with a low 0.8 gpm flow rate leads to fast dry times.

Both Rainmaker models have the unique feature of onboard storage of a floor tool. In addition, there is an onboard compartment for storing chemical bottles, hand tools or other cleaning items. Combined with the cord hooks, the Rainmaker has self contained storage of the standard cleaning tools.

The Rainmaker models were designed with ease of maintenance and transport in mind. The clam shell design allows easy access for servicing. Finger grips and a handle provide assistance when lifting the Rainmaker into a vehicle for transport. Large non-marking rear wheels allow for maneuverability and stair climbing.

The Rainmaker® Models are perfect for...

- Contract Cleaners
- Schools and Universities
- Retail
- Healthcare Facilities
- Office Buildings
- Hotels and Motels
