

Edge 12[®]

Upright Vacuum

The Edge 12[®] single motor vacuum swipes away dirt even if it is on the edge. Available in a 12 in (30 cm) cleaning path, the Edge 12 has excellent pickup and edge cleaning capabilities.

This versatile machine has an onboard storage space for two bags so an operator can efficiently replace full bags. The built-in hose, wand and accessories allow for cleaning an entire area with ease. In addition, the reach-under design, allows the Edge 12 to lie completely flat for vacuuming under furniture and other obstacles.

The powerful, 5,000 rpm, brush has height adjustments for virtually any height of carpet pile. Also, in the upright position, the brush will not touch the carpet. This enables using the accessories and storing the vacuum without damaging the brush. For added convenience, the brush is removable without the use of tools for servicing and replacing.

The motor is protected from overheating by the thermal overload protection. There is also a warning system if a clog or full bag goes undetected by the operator. If the brush roll is impeded, the electronic sensor will alert the operator.

The Edge 12 has filtration built in to protect the machine and the indoor air quality. The vacuum motor is filter protected so it will last longer and for sound insulation. The Edge 12 is hospital quiet at only 69 dB A. Aside from the 2-ply paper bag, the machine is equipped with a pre-filter and an electrostatic micron exhaust filter that traps particles down to 0.1 micron. For increased filtration, a H.E.P.A. filter is available as an option.

The Edge 12[®] is perfect for...

- Hotels/Motels
- Restaurants
- Healthcare
- Contract Cleaners
- Office Buildings and Institutions
- Schools and Universities

TECHNICAL SPECIFICATIONS

Motor	120/60 hz, 850 watts, 7.5 amps, 2 stage
Motor Protection	Thermal overload protection and electronic shutoff
Waterlift	79 in (200 cm)
CFM	92
Brush	Single row nylon bristles in a 360° chevron pattern with variable brush height. Dynamic balanced brush roller.
Brush Speed	5,000 rpm, driven by a toothed timing belt
Brush Length	10.75 in (27.2 cm)
Cleaning Path	12 in (30 cm)
Filtration	2-ply paper bag, inlet foam filter, motor protection filter, hospital grade exhaust filter and an optional H.E.P.A. filter
Bag Capacity	244 in ³ (4 L)
Filter Capabilities	Electrostatic exhaust filter – 97% efficiency at 0.3 micron H.E.P.A. filter – 99.97% efficiency at 0.3 micron
Onboard Tools	4:1 stretch hose, telescopic wand, crevice tool, and upholstery tool
Power Cable	41 ft (12.5 m) safety yellow, 18/3 wire
Sound Level	69 dB A
Weight	15 lb (6.8 kg) without cord / 17.7 lb (8.0 kg) with cord / 21 lb (9.5 kg) shipping
Width	12 in (30.5 cm)
Length	12.5 in (31.75 cm)
Height	45 in (114 cm) or 42.5 in (113 cm)
Part Number	56 649 960

Specifications are subject to change without notice.

Standard Accessories Include

- 4:1 stretch hose
- 24 in (61 cm) telescopic wand extends to 38 in (97 cm)
- Crevice tool
- Upholstery tool
- Extra bag in storage space
