

# EWD-320 & EWD-315

## Wet/Dry Vacuums

Euroclean wet dry vacuums are intended to be used day in and day out in heavy duty commercial, industrial and floor maintenance applications.

The 20 gallon and 15 gallon machines have the same compact footprint to reduce storage space. Rubberized non-marking wheel are quiet on hard floor surfaces and the large rear wheels make moving the machine up and down stairs a breeze. Both units have a rear drain hose for easy disposal of liquids.

The EWD vacuums have the most versatile dry filtration option of any Euroclean wet dry vacuum ever produced. A washable cloth filter basket comes standard and can be used alone to collect a large volume of dry debris directly into the tank. The optional synthetic dust bag makes disposal easier and neater. The optional cartridge filter can be added for even higher filtration and then the filter basket acts as a pre-filter catching the larger debris and maximizing the life of the cartridge filter. The ultimate in filtration is realized with the addition of the H.E.P.A. protection ring and true H.E.P.A. filter. These parts work synergistically to capture 99.97% of particles that are 0.3 microns and larger.

### The EWD-320 and EWD-315 are perfect for...

- Educational Institutions
- Government Facilities
- Building Service Contractors
- Industrial and Factory Settings
- Hospitality and Gaming
- Retail
